

## Scheduler Model Evolution

The following model was created to describe the scheduling process of a meeting. The actors *Meeting Initiator*, *Meeting Participant*, and *Meeting Scheduler* each interact with one another to schedule, participate, and provide details for the meeting.

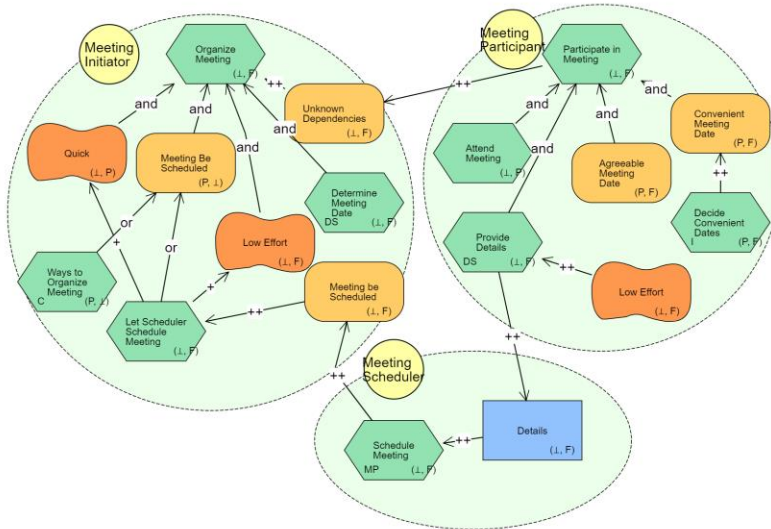

Initial model:

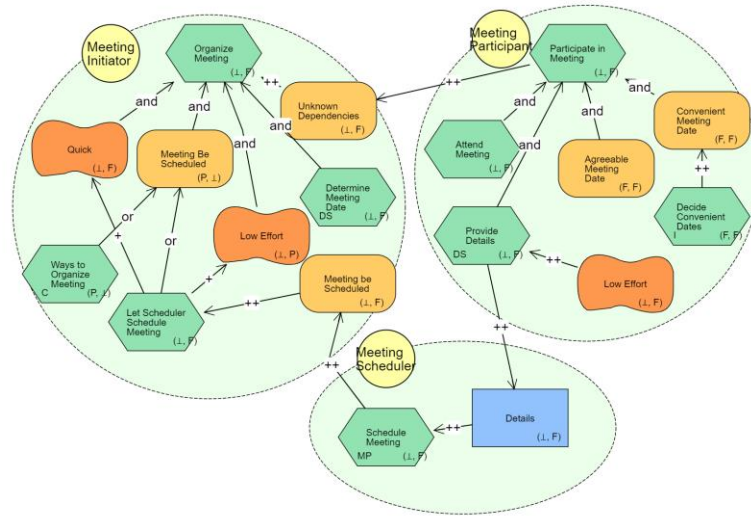

Scheduler model over a simulated path, time point shown in bottom left

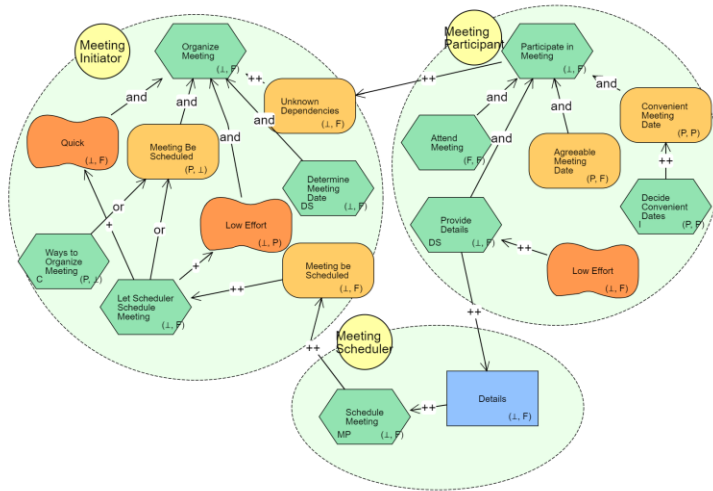

0/0

Scheduler model over a simulated path, time point shown in bottom left

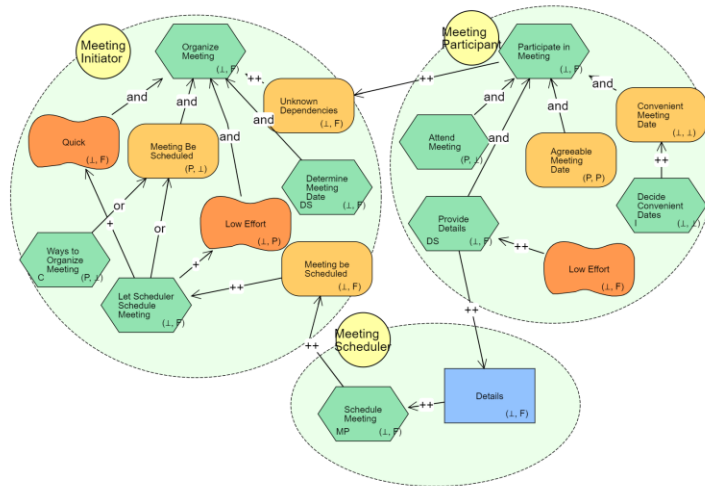

2/8

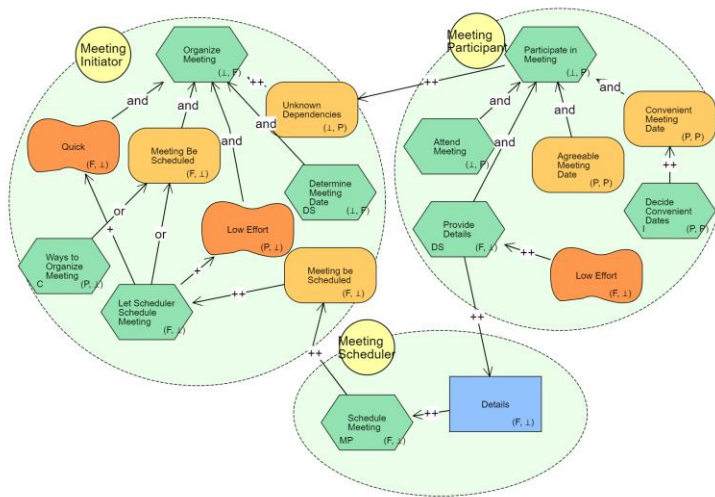

3/13

Scheduler model over a simulated path, time point shown in bottom left

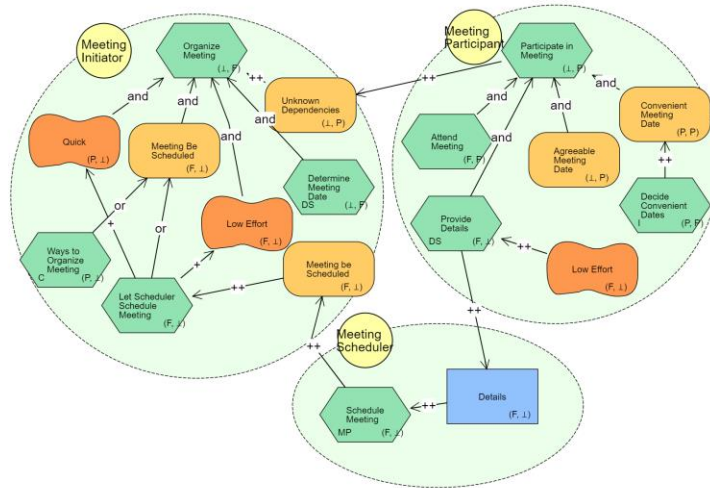

4/35

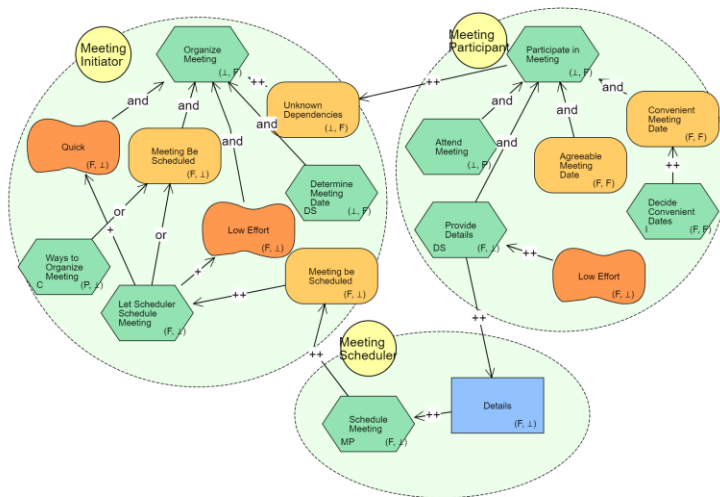

5/55

Scheduler model over a simulated path, time point shown in bottom left

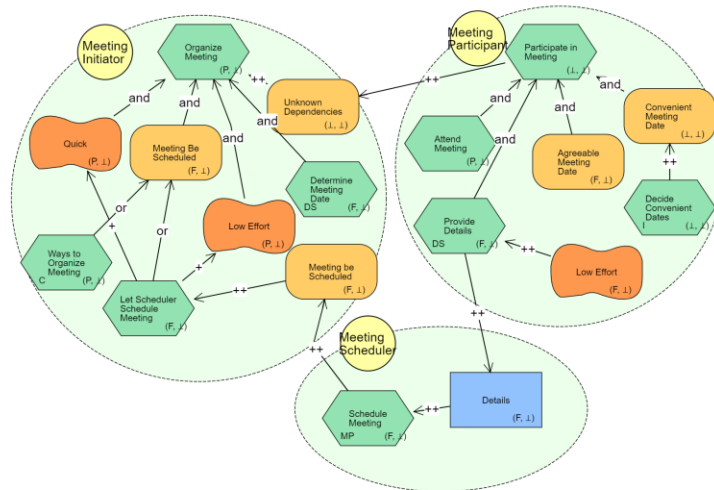

6/68

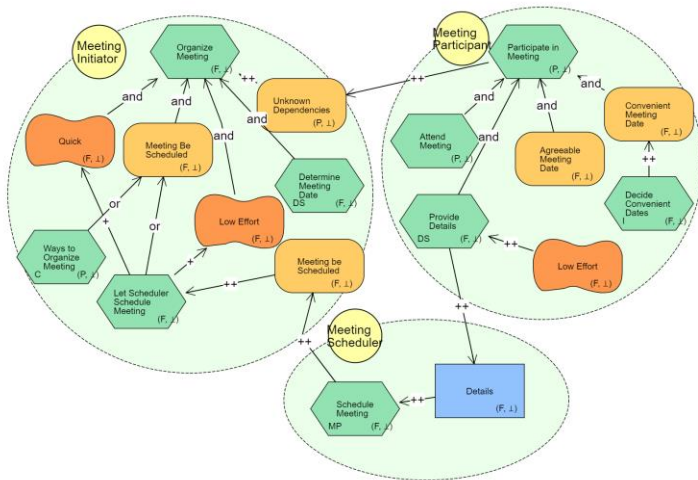

7/71

Scheduler model over a simulated path, time point shown in bottom left

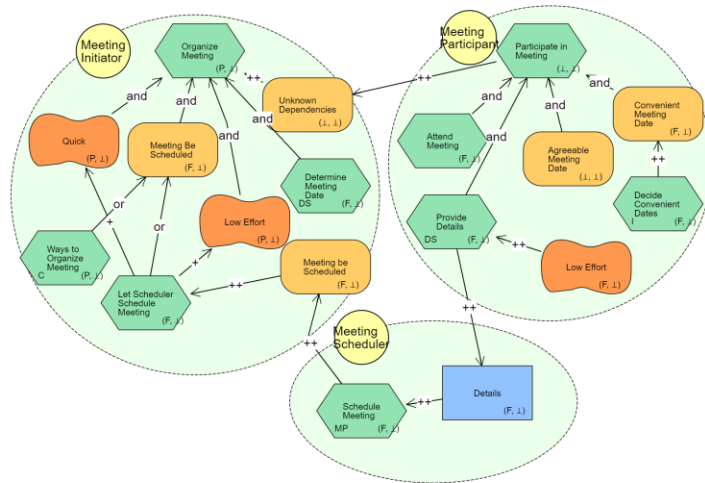

8/87

9/92

Scheduler model over a simulated path, time point shown in bottom left

10/94
